

MD SABIR ALI

Senior Deployment & Release Engineer | Technical Release Management

OpenShift • Kubernetes • Helm • Jenkins • CI/CD • Ericsson EOC/ECM/PC

India | Mobile: [Update] | Email: [Update] | LinkedIn: [Update]

PROFESSIONAL SUMMARY

Technology professional with 11+ years of telecom and enterprise application experience, focused on Deployment, Release Engineering and Technical Release Management since 2024. Lead release planning and execution for Ericsson EOC, ECM and Process Controller on the Saudi Telecom Company (STC) program across DEV, SIT, SQT, Pre-Production, Production and DR. Hands-on with OpenShift/Kubernetes, Helm, Jenkins CI/CD, Git/Bitbucket, YAML, BPMN/DMN, EOC/ECM Metadata JAR deployments, Linux and Oracle/SQL. Serve as the first technical contact for deployment issues and mentor junior engineers through release execution and troubleshooting.

KEY ACHIEVEMENTS

- Delivered two major STC projects - LEGO and COMF - through Production Go-Live and onward to DR, leading deployment and release execution across lower environments, Pre-Production, Production and DR.
- Enabled deployment readiness for a major EOC product-version upgrade by implementing required manual-deployment changes and coordinating CI/CD alignment with the DevOps team across target environments.

CORE EXPERTISE

- Deployment & Release Engineering - CI/CD-driven and controlled manual deployments across non-production, Production and DR
- Technical Release Management - release planning, Jira governance, MOP preparation/review, sequencing, windows, readiness and stakeholder coordination
- OpenShift / Kubernetes & Helm - workload validation, logs, exec/describe, services/endpoints, install/upgrade, YAML configuration and rollback/recovery
- CI/CD & Release Workflows - Jenkins execution/troubleshooting, deployment configuration changes and Git/Bitbucket workflows
- Application & Process Deployments - BPMN/DMN, EOC Metadata JAR, ECM Metadata JAR and Camunda-based Process Controller
- DR & Technical Leadership - Active-Passive switchover/switchback, deployment triage, cross-team routing and mentoring of 2-3 junior engineers

TECHNICAL SKILLS

Primary Stack	OpenShift, Kubernetes, Helm, Jenkins, CI/CD, Git, Bitbucket, Linux, YAML
Deployment Artifacts	BPMN, DMN, EOC Metadata JAR, ECM Metadata JAR, Camunda-based Process Controller
Containers / Registry	Docker & container images, image tags, repositories/registries
Database	Oracle, SQL, PL/SQL, MySQL, SQL Developer, TOAD
Ericsson / Telecom	Ericsson Order Care (EOC), Ericsson Catalog Manager (ECM), Process Controller (PC), Order Management
Monitoring / ITSM	Splunk, AppDynamics, Datadog, Jira, Confluence, ServiceNow, Remedy
Integration / Scripting	REST, SOAP Web Services, Shell Scripting, XML
Additional Exposure	AWS, Ansible, Kafka, Keycloak/IAM, WebLogic

PROFESSIONAL EXPERIENCE

Senior Software Developer - Deployment & Release Engineering

Sep 2019 - Present

Ericsson India Global Services Pvt. Ltd.

Client: Saudi Telecom Company (STC) | Deployment & Release focus since 2024

- Lead project release management covering release planning, Jira tracking, MOP preparation/review, deployment sequencing and windows, stakeholder readiness, execution coordination and post-release validation.
- Execute Ericsson EOC, ECM and Process Controller releases across DEV, SIT, SQT, Pre-Production, Production and DR using OpenShift/Kubernetes and Helm, through both CI/CD and controlled manual deployment paths.
- Run and troubleshoot Jenkins CI/CD pipelines, implement required deployment configuration changes with Development/DevOps teams and use controlled manual deployment when automated pipelines are blocked.
- Serve as the first technical contact for deployment issues: triage failures, determine the likely domain, resolve within team scope and coordinate routing/follow-up with Development, DevOps, Infrastructure or dependent teams.
- Mentor 2-3 junior engineers on deployment procedures, release execution and troubleshooting, including hands-on guidance during complex deployment scenarios.
- Perform Helm install/upgrade, maintain environment-specific YAML values/configuration and support release validation, rollback and recovery.
- Deploy and validate BPMN/DMN process artifacts and EOC/ECM Metadata JARs for application releases, workflow changes and product/configuration updates.
- Execute and coordinate Active-Passive DR switchover/switchback using approved MOPs, including team coordination and post-activity validation.
- Troubleshoot OpenShift/Kubernetes failures such as CrashLoopBackOff, ImagePullBackOff, init-container and readiness/liveness issues; analyze dependencies involving Oracle, IAM/Keycloak, Kafka, licensing and service endpoints.

EARLIER PROFESSIONAL EXPERIENCE

Software Support Engineer

Sep 2017 - Sep 2019

Amdocs Development Center India LLP, Gurgaon

Client: Airtel India - Mobility / Telemedia

- Supported application changes and releases in Oracle/Linux environments, coordinating implementation with infrastructure and dependent teams.
- Resolved complex order-flow issues and major incidents using SQL/PLSQL and Unix/Linux, including root-cause analysis and resolution coordination.
- Participated in release, patching, DR, SSL and application restart/sanity activities and prepared implementation plans for controlled changes.
- Supported change management and release execution through ServiceNow and cross-team coordination.

Software Engineer

May 2015 - Aug 2017

IBM India Pvt. Ltd., Noida

Client: Airtel India - DTH CANNON Provisioning

- Supported a telecom order-provisioning platform integrated with multiple external applications in Oracle, Linux/AIX and EAI environments.
- Implemented application changes/releases, performed root-cause analysis and coordinated technical resolution.
- Used SQL/PLSQL, SQL*Loader and Unix shell scripting for data handling, troubleshooting and scheduled activities.
- Performed application/server monitoring, capacity checks and incident/change coordination.

EDUCATION

Master of Computer Applications (MCA) - Magadh University, Bihar
